RevNo	Revision note	Date	Signature	Checked

Note:

The distance between view lines should be set based on the last two digits of your A-number:

If the last two digit [0 19], use: 1 × (last two digits) --->f = 1

If the last two digits [20 40], use: 0.5 × (last two digits) --->f = 0.5

If the last two digits [41 99], use: 0.25 × (last two digits) --->f = 0.25

f -is a multiplying factor.

Example:

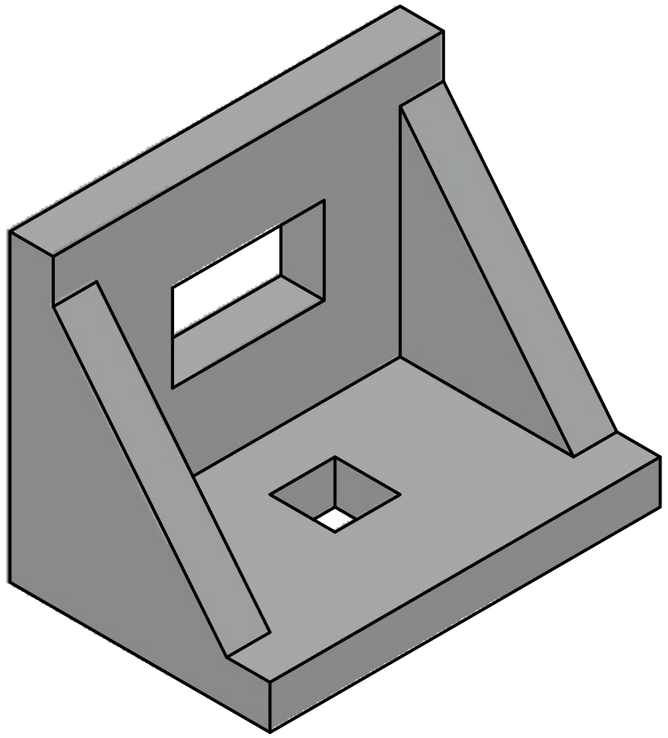

If your A-number is A0011118, the last two digits is 18, so: 1 × 18 = 18.

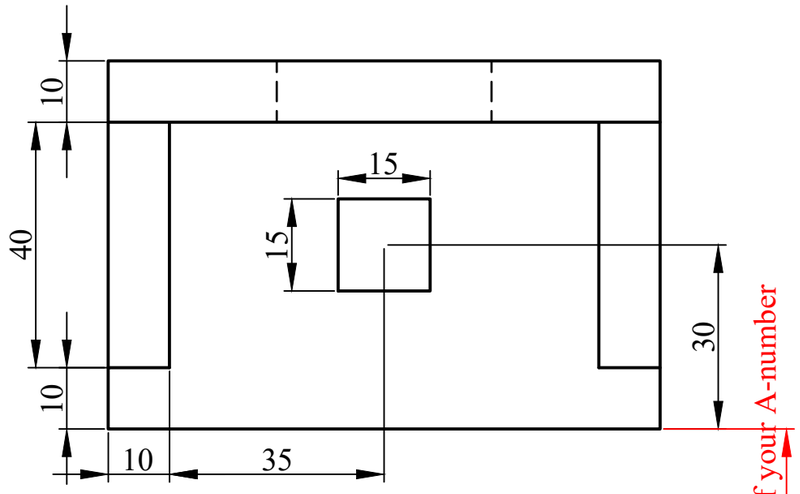

If your A-number is A0011128, the last two digits is 28, so: 0.5 × 28 = 14.

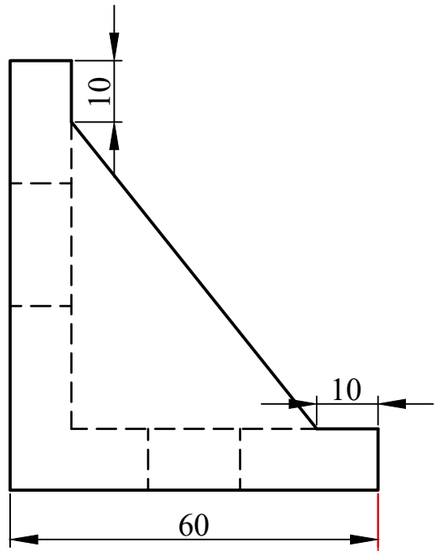

If your A-number is A0011188, the last two digits is 88, so: 0.25 × 88 = 22.
